## EDUCATION

**Trinity College of Engineering and Research**                                                        Pune
Bachelors of Engineering in Information Technology                             Nov 2022 - Jun 2025
                                                                                                       Score - 89.5%

**Dr. N.J.PaulBudhe College of Engineering**                                                Ahmednagar
Diploma In Computer Engineering                                                         Aug 2019 - Jul 2022
                                                                                                       Score - 83.94 %

**Army Public School**                                                                              Ahmednagar
SSC                                                                                           Jun 2018 - Jun 2019
                                                                                                       Score - 77 %

## SKILLS

**Programming Languages:** Java, HTML, CSS.
**Version Control System:** Git
**Databases:**  MySQL
**Soft Skills:** Critical thinking, Problem-solving skills, Teamwork, Communication

## PROJECTS

### E-Cool (IOT-based Portable Air Conditioner)

- **Technologies Used:** ESP8266, Peltier Module, Sensors, Blynk App, OLED Display, Bladeless Fan, Solar-charged Battery
- Designed an eco-friendly, compact air conditioner powered by solar energy with smart temperature and humidity regulation.
- Integrated IoT features for autonomous control and real-time monitoring via the Blynk app.

### E-Vakeel Website

- **Technologies Used:** HTML, CSS, JavaScript, SQL
- Built a responsive web platform for legal services offering appointment booking, inquiry handling, and an admin dashboard.
- Made it easy for clients and lawyers to connect using a simple design and organized system.

## INTERNSHIPS

### CODSOFT (Virtual Internship)

Java Intern | 1 month                                                                   Dec 2023 – Jan 2024

- **Built Console-Based Applications:** Developed systems like Student Management, Currency Converter, ATM Interface, and Grade Calculator with features such as menu-driven navigation, user input handling, and input validation.
- **Handled Daily Java Tasks**: Gained hands-on experience with Java syntax, control structures, and object-oriented programming by implementing real-time tasks and ensuring functional, bug-free solutions.
- **Developed a Car Rental System (Intermediate Project):** Created a Java console application to rent and return cars, manage customer and car details, and track rental history.

## ADDITIONAL ACTIVITIES

- SAP Code Unnati Innovation Marathon 2.0: Semifinalist
- Sports Coordinator at TITANS (Student Council), IT Dept., TCOER
- Languages Known: English, Hindi, Marathi
